Revision 0: October 12, 2026

Revision History

Name	Date	Reason For Changes	Version
Andy Huynh	2026-10-05	First Draft	1.0
Andreas Sideris	2026-10-10	P3 and P4 drafts	1.0

This document follows the requirements documentation structure presented in the Handbook of requirements and business analysis, by Bertrand Meyer.

Contents

Goals book **3**
G.1 Context and overall objective . . . 4
G.2 Current situation . . . 4
G.3 Expected benefits . . . 4
G.4 Functionality overview . . . 5
G.5 High-level usage scenarios . . . 5
G.6 Limitations and exclusions . . . 5
G.7 Stakeholders and requirements sources . . . 5

Environment book **6**
E.1 Glossary . . . 6
E.2 Components . . . 6
E.3 Constraints . . . 6
E.4 Assumptions . . . 6
E.5 Effects . . . 6
E.6 Invariants . . . 7

System book **8**
S.1 Components . . . 8
S.2 Functionality . . . 8
S.3 Interfaces . . . 8
S.4 Detailed usage scenarios . . . 8
S.5 Prioritization . . . 9
S.6 Verification and acceptance criteria . . . 9

Project book **10**
P.1 Roles and personnel . . . 10
P.2 Imposed technical choices . . . 10
P.3 Schedule and milestones . . . 10
P.4 Tasks and deliverables . . . 11
P.5 Required technology elements . . . 12
P.6 Risks and mitigation analysis . . . 12
P.7 Requirements process and report . . . 12

Goals

Contents

G.1 Context and overall objective 4
G.2 Current situation 4
G.3 Expected benefits 4
G.4 Functionality overview 5
G.5 High-level usage scenarios 5
G.6 Limitations and exclusions 5
G.7 Stakeholders and requirements sources 5

Comment: *Goals are "needs of the target organization, which the system will address". While the development team is the principal user of the other books, the Goals book addresses a wider audience: essentially, all stakeholders.*

G.1 Context and overall objective

Comment: *High-level view of the project: organizational context and reason for building a system.*
Comment: *This chapter should not be empty!*

Goal 1. This is a goal example. If you need explicit (and automatic) numbering, you can use the definitions in the `.tex` template. Is is refined by 3

Requirement 2. *This is a requirement example. It illustrates how numbering is continuous and cross-types (if this is what you need).*

G.2 Current situation

Comment: *Current state of processes to be addressed by the project and the resulting system.*

Requirement 3. *This is a requirement example. It refines 1*

G.3 Expected benefits

Comment: *New processes, or improvement to existing processes, made possible by the projectâ€™s results.* **Comment:** *This chapter should not be empty!*

G.4 Functionality overview

Comment: *Overview of the functions (behavior) of the system. Principal properties only (details are in the System book).*

G.5 High-level usage scenarios

Comment: *Fundamental usage paths through the system.*

G.6 Limitations and exclusions

Comment: *Aspects that the system need not address.*

G.7 Stakeholders and requirements sources

Comment: *Groups of people who can affect the project or be affected by it, and other places to consider for information about the project and system.* **Comment:** *This chapter should not be empty!*

Environment

Contents

E.1 Glossary 6
E.2 Components 6
E.3 Constraints 6
E.4 Assumptions 6
E.5 Effects 6
E.6 Invariants 7

Comment: *The Environment book describes the application domain and external context, physical or virtual (or a mix), in which the system will operate.*

E.1 Glossary

Comment: *Clear and precise definitions of all the vocabulary specific to the application domain, including technical terms, words from ordinary language used in a special meaning, and acronyms. This chapter should not be empty!*

E.2 Components

Comment: *List of elements of the environment that may affect or be affected by the system and project. Includes other systems to which the system must be interfaced.*

E.3 Constraints

Comment: *Obligations and limits imposed on the project and system by the environment.* **Comment:** *This chapter should not be empty!*

E.4 Assumptions

Comment: *Properties of the environment that may be assumed, with the goal of facilitating the project and simplifying the system.*

E.5 Effects

Comment: *Elements and properties of the environment that the system will affect.*

E.6 Invariants

Comment: *Properties of the environment that the systemâ€™s operation must preserve.*

System

Contents

S.1 Components 8
S.2 Functionality 8
S.3 Interfaces 8
S.4 Detailed usage scenarios 8
S.5 Prioritization 9
S.6 Verification and acceptance criteria 9

Comment: *The System book refines the Goal one by focusing on more detailed requirements about the system under development, mainly its constituents, behaviors and properties.*

S.1 Components

Comment: *Overall structure expressed by the list of major software and, if applicable, hardware parts.*
Comment: *This chapter should not be empty!*

S.2 Functionality

Comment: *One section, S.2.n, for each of the components identified in S.2, describing the corresponding behaviors (functional and non-functional properties).* **Comment:** *This chapter should not be empty!*

S.3 Interfaces

Comment: *How the system makes the functionality of S.2 available to the rest of the world, particularly user interfaces and program interfaces (APIs).*

S.4 Detailed usage scenarios

Comment: *Examples of interaction between the environment (or human users) and the system: use cases, user stories.*

S.5 Prioritization

Comment: *Classification of the behaviors, interfaces and scenarios (S.2, S.3 and S.4) by their degree of criticality.*

S.6 Verification and acceptance criteria

Comment: *Specification of the conditions under which an implementation will be deemed satisfactory.*

Project

Contents

P.1 Roles and personnel 10
P.2 Imposed technical choices 10
P.3 Schedule and milestones 10
P.4 Tasks and deliverables 11
P.5 Required technology elements 12
P.6 Risks and mitigation analysis 12
P.7 Requirements process and report 12

Comment: *The Project book describes all the constraints and expectations not about the system itself, but about how to develop and produce it.*

P.1 Roles and personnel

Comment: *Main responsibilities in the project; required project staff and their needed qualifications.*

P.2 Imposed technical choices

Comment: *Any a priori choices binding the project to specific tools, hardware, languages or other technical parameters.*

P.3 Schedule and milestones

The project's primary schedule will follow the milestones and dates below, each named according to the deliverables they must produce (as discussed in the project's development plan):

- M1 Problem Statement, Development Plan, PoC Plan, and Team Charter (Due by September 28, 2026)
- M2 SRS and Hazard Analysis Revision 0 (Due by October 19, 2026)
- M3 VnV Plan Revision 0 (Due by November 2, 2026)
- M4 Design Document Revision -1 and CD-Fall (FODA) (Due by November 16, 2026)

- M5 PoC Demo (Due by November 23, 2026)
- M6 Design Documentation Revision 0 (Due by January 18, 2027)
- M7 Revision 0 Demo (Due by February 1, 2027)
- M8 VnV Report Revision 0 and CD-Winter Revision 0 (Usability Report) (Due by March 8, 2027)
- M9 Final Demonstration Revision 1, EXPO Demonstration (Due by March 15, 2027)
- M10 Final Documentation (Revision 1) (Due by March 31, 2027)

P.4 Tasks and deliverables

The tasks required to be completed to develop RealmForge (and its feature variation capabilities) will be managed using an iterative and incremental approach. Within each milestone (in this context the milestones associated with source code development), team members will divide the work to be done into suitable issues, viewable in RealmForge's GitHub Project. The issues will be coordinated using a Kanban method, tracking their progress and review status. The software features associated with these issues will be regularly planned, developed, reviewed, tested, and deployed using a feature branch workflow, contributing towards each set milestone.

A schedule of development deliverables pertaining to the milestones listed above is available below, complete with relevant requirement sets that are planned to be implemented at the completion of each deliverable. Milestones that purely involve documentation development are omitted, as this schedule is intended to outline the completion of software development tasks and their associated requirements.

Detailed Schedule:

- M5 PoC Demo
  - **Deadline:** November 23, 2026
  - **Software Deliverables:** RealmForge Proof of Concept Build
  - **High Priority Requirements:** NEED TO ADD
  - **Requirement Sets Implemented:** NEED TO ADD
- M7 Revision 0 Demo
  - **Deadline:** February 1, 2027
  - **Software Deliverables:** RealmForge Revision 0 Build
  - **High Priority Requirements:** NEED TO ADD

  - **Requirement Sets Implemented:** NEED TO ADD

- M9 Final Demonstration Revision 1, EXPO Demonstration
  - **Deadline:** March 15, 2027
  - **Software Deliverables:** RealmForge Revision 1 Build
  - **High Priority Requirements:** NEED TO ADD
  - **Requirement Sets Implemented:** NEED TO ADD

P.5 Required technology elements

Comment: *External systems, hardware and software, expected to be necessary for building the system.*

P.6 Risks and mitigation analysis

Comment: *Potential obstacles to meeting the schedule of P.4, and measures for adapting the plan if they do arise.*

P.7 Requirements process and report

Comment: *Initially, description of what the requirements process will be; later, report on its steps.*
